> Question: Describe how you would develop and manage an operational plan to improve customer service in a retail store.

> Sample Answer:

> To develop and manage an operational plan aimed at enhancing customer service in a retail store, I would begin by assessing current customer feedback and identifying specific areas needing improvement, such as wait times, staff responsiveness, or product knowledge. Next, I would set SMART objectives, for example, reducing customer wait times by 20% within three months.

> I would then identify the necessary resources, including staff training programs, additional staffing during peak hours, and updated customer service protocols. The plan would be broken down into actionable tasks, such as conducting staff training sessions, revising service scripts, and implementing a feedback system.

> Responsibilities would be assigned to team leaders, with clear deadlines and performance indicators. Throughout the implementation, I would monitor progress using KPIs such as customer satisfaction scores and average service times. Regular team meetings would be held to review progress, address challenges, and make adjustments as needed.

> Risk management would involve preparing contingency plans for staffing shortages or system disruptions. Finally, I would evaluate the plan's success after the set period, analyzing data and gathering staff and customer feedback to inform future improvements.
